PROFESSIONAL SUMMARY

Computer Engineer with 10+ years of experience managing technology infrastructure, LAN/WAN networks, and technical support in public-sector, healthcare, and private environments. Licensed member of the Peruvian College of Engineers (CIP). Specialist in Python automation, API integration, AI agents, web scraping, and backend development with FastAPI and SQL Alchemy. Contributor to 30+ open-source projects with 198+ merged pull requests, including security fixes, automation workflows, and performance improvements (up to 82% latency reduction). I build reliable, scalable technical solutions with a practical, results-oriented mindset — now seeking a remote international role where infrastructure rigor meets modern AI engineering.

CORE COMPETENCIES

- **IT Support:** Onsite & remote, Level 1 / Level 2
- **IT Infrastructure:** Asset inventory, preventive & corrective maintenance
- **Networks:** LAN/WAN administration, connectivity, IP configuration
- **AI & Automation:** Claude API, ChatGPT API, LangChain, n8n, AI agents
- **Backend Development:** FastAPI, Django, Flask, SQLAlchemy, Pydantic
- **Web Scraping:** Playwright, Selenium, BeautifulSoup
- **DevOps & Cloud:** Docker, GitHub Actions, Railway, Render
- **Databases:** SQL Server, Oracle, PostgreSQL, MySQL, SQLite
- **Security:** Vulnerability fixes, secure coding practices
- **Institutional Systems:** SIGA, SIAF, SISGEDO, MELISSA

PROFESSIONAL EXPERIENCE

IT Maintenance & Technical Support Specialist

FISSAL — Ministry of Health of Peru, Office of Technology and Information (OTI)

Aug 2026 – Present

Tech stack: LAN/WAN · Python automation & bots · FastAPI · Django · Flask · SQLAlchemy · Playwright · Selenium · BeautifulSoup · Docker · GitHub Actions · Railway · Render

- Perform preventive hardware and software maintenance on desktops, laptops, printers, and peripherals, extending equipment lifecycle across the institution.
- Administer antivirus protection, security patching, OS updates, and diagnostic routines across the institutional computer fleet.
- Provide Level 1 and Level 2 technical support, onsite and remote: LAN connectivity, IP configuration, shared folders, and network printers.
- Conduct technical inventories and diagnostics to identify obsolete equipment; prepare formal technical reports and disposal certificates compliant with institutional audit standards.
- Design Python automation, bots, and orchestration workflows (n8n) that eliminate repetitive manual tasks in reports, data extraction, and notifications.
- Build backend services and internal APIs with FastAPI, Django, Flask, and SQLAlchemy to support administrative processes.
- Develop web scraping and data-collection pipelines with Playwright, Selenium, and BeautifulSoup.
- Containerize and deploy services with Docker; automate CI/CD with GitHub Actions; ship to Railway and Render.

Inventory Officer

Regional Government of Lima — Accounting & Inventory Area

Jan 2026 – Mar 2026

- Verified the physical condition, location, and conservation status of movable assets across offices, warehouses, and field sites.
- Updated asset records in SIGA and authorized systems; reconciled physical counts against accounting records.
- Prepared inventory reports and certification documents supporting the annual physical inventory declaration of the regional government.

Technical Support, IT & Networks Specialist

Regional Directorate of Agriculture of Lima — Huacho, Peru

May 2021 – Dec 2025

- Delivered end-to-end IT support across the regional directorate: software troubleshooting, account migration, and daily operations.
- Performed preventive and corrective maintenance on computers, printers, and peripherals; administered users on SISGEDO and the domain server.
- Installed and supported institutional systems (SIGA, SIAF, MELISSA); resolved connectivity issues and administered LAN services.

Administrative Assistant — IT Area

District Municipality of Sayán, Peru

Jan 2020 – Dec 2020

- Supported procurement and service-order documentation for SIAF registration, ensuring records were complete and audit-ready.
- Tracked payments and supplier documentation, coordinating with the accounting area to keep institutional registries up to date.

IT & Administrative Specialist — Works Unit

PRONIS — MINSA, Lima, Peru

May 2018 – Dec 2019

- Digitized Works Unit documentation and provided technical support on institutional systems and daily IT tools.
- Created an indexed Excel archive with hyperlinks to generated PDF documentation; classified and archived the documentary collection.

Database Analyst & Technical Support Specialist

Clínica Santa María del Sur S.A.C., Lima, Peru

May 2015 – Apr 2016

- Analyzed and organized invoice databases by payer category (EPS, SCTR); generated billing covers for major insurers (SIS, Pacífico, Rímac, Interseguro, Mapfre).
- Provided support and maintenance for 90+ users, computers, printers, and peripheral equipment; worked with Oracle (TOAD), PowerBuilder, and clinical systems.

Technical Support & Systems Assistant

MINEDU — PRONIED, Lima, Peru

Feb 2015 – Apr 2015

- Maintained and repaired PCs, printers, and laptops for approximately 200 users across multiple sites.
- Produced multi-site asset reports using SQL Server-generated databases and advanced Excel.

Pre-Professional Intern — Technical Support & AutoCAD

Services Integrals of Engineering and Architecture - Huacho

Aug 2013 – May 2014

- Maintained and repaired computer systems and prepared residential construction drawings in AutoCAD.

FEATURED PROJECTS & OPEN SOURCE

FastAPI AI Portfolio

Production REST API — fastapi-ai-portfolio.onrender.com/docs

Live demo deployed on Render

- Production-grade REST API simulating AI-powered text processing with request-history persistence and automatic API documentation.
- Built with FastAPI, SQLAlchemy, and Pydantic, demonstrating clean architecture, validation, and persistent storage suitable for portfolio review.

Automated Trading Bot

Autonomous market-monitoring system — github.com/JHON12091986

Runs 24/7 on GitHub Actions

- Monitors 10+ stocks and crypto assets in real time: RSI calculation, overbought/oversold detection, and simulated order execution.
- Sends instant Telegram alerts on detected signals; fully automated scheduling with GitHub Actions (zero-cost infrastructure).
- Stack: Python, FastAPI, SQLAlchemy, GitHub Actions.

Trend Intelligence API

Multi-platform scraping & analysis — github.com/JHON12091986

- Multi-platform scraping and intelligence pipeline for Reddit, X, and YouTube, producing structured reports with sentiment analysis and pattern detection.
- Asynchronous architecture with FastAPI, Playwright, and aiohttp for efficient concurrent data collection.

Open-Source Contributions

30+ projects · 198+ merged pull requests — via Algora, Gitcoin & Rustchain bounties

Ongoing

- Security fixes: authentication, injection, and template vulnerabilities patched in open-source libraries.
- Performance: I/O optimization in YAML/JSON storage backends and O(1) file-inventory tracking, reducing scan latency by up to 82%.
- Automation workflows and reliability improvements across widely used developer tools.

EDUCATION & CERTIFICATIONS

- **Computer Engineer —** Universidad Nacional José Faustino Sánchez Carrión (2006 – 2013)
- **Master's program in Systems Engineering —** Degree completed; thesis in progress
- **Licensed Member, Peruvian College of Engineers (CIP), Lima —** Since Sep 2023
- **Python Essentials 1 & 2 —** Python Institute / Cisco Networking Academy (2023 – 2026)
- **Computer Assembly & Maintenance —** National University of Engineering (UNI), Lima (2018)
- **Bitdefender GravityZone Certified Technical Specialist —** 2024
- **Cloud Infrastructure, Computer Security & Server Administration —** Fundación Carlos Slim (2025)

ADDITIONAL INFORMATION

Languages: Spanish (native) · English (professional working proficiency — improving continuously)

Availability: Immediate — open to remote international roles; time zone GMT-5 (overlaps US East Coast mornings)

Portfolio: github.com/JHON12091986 · FastAPI demo: fastapi-ai-portfolio.onrender.com/docs

Work style: Self-directed, documentation-driven, comfortable in both Spanish and English-speaking teams
